As MPC and CSUMB work to better serve the diverse community of students on the Monterey Peninsula, especially amid these challenging times, our ongoing and future efforts to build and strengthen the relationship between our campuses, programs and departments become essential to our ability to complete our mission. At CSUMB, where the majority of the student body is comprised of first-generation students, Dr. Ochoa has emphasized inclusion, outreach, and the importance of a rigorous educational experience. In large measure because we share these priorities, we have grown as educational partners over the past two decades. It is our hope that Dr. Ochoa's address today will inspire new initiatives and creative collaborations that will build upon our past, and further improve our ability to serve our community with our nearest and most vital neighbor. | | | |
